Rosinen Initiative

Dear friends!

We are turning to you on behalf of teachers and children who attend our Multidisciplinary training and rehabilitation center of St. Nicholas from Lviv. We have children with special educational needs, kids with an extremely high rate of health loss are partially self-sufficient and therefore need outside care.

On the constant basis we have 220 children 3-15 years old in our center and now additionally we have 70 orphans as a internally displaced persons because of Russian invasion to Ukraine. The situation with financing is hard now, so we are in need for food, hygiene products, diapers, detergents. Even in peaceful times those special kids need high attention, more then that in times of war. So we kindly ask you to support our Center if possible.

Thank you for your help and support!

Yours sincerely,  
Principal of Municipal institution of the Lviv regional council  
Multidisciplinary training and rehabilitation center of St. Nicholas
